

EDDRICK L. MIANO

SOFTWARE DEVELOPER | COMPUTER ENGINEER

Escalante City, Negros Occidental | +63 945 481 7970 | eddrickmiano11@gmail.com | <https://eddrickmiano.vercel.app>

SUMMARY

Software Developer and Computer Engineering graduate with hands-on experience developing web and mobile applications using React, TypeScript, React Native, and Expo. Skilled in building user-focused interfaces, integrating REST APIs, debugging applications, and conducting system testing. Experienced in contributing to an industry mobile application project and developing an AI-enabled capstone project. Currently focused on expanding my skills in software and web development and building reliable, practical applications.

SKILLS

- **Programming Languages:** JavaScript, TypeScript, Python, PHP, C++
 - **Frontend:** React, React Native, Expo, HTML, CSS, Tailwind CSS
 - **Backend and APIs:** Laravel, REST API Integration
 - **AI/ML:** TensorFlow, TensorFlow Lite, n8n
 - **Databases:** MySQL, Airtable
 - **Tools:** Git, GitHub, Figma
-

EXPERIENCE

- **Software Development Intern (OJT) – Bluebeans System Inc. | June 2025 – August 2025**
 - Developed frontend features for a mobile application using React Native and Expo.
 - Collaborated with the development team in implementing and testing mobile application features.
 - Assisted in frontend and backend tasks, debugging, and system testing.
-

PROJECTS

- **Smart Stethoscope System – Project Leader | August 2025 – March 2026**
 - Led a team in developing a smart stethoscope system designed to detect heart and lung abnormalities from recorded audio signals.
 - Trained, evaluated, and optimized machine-learning models using Python and TensorFlow.
 - Developed frontend features for displaying recorded results, baseline comparisons, and data visualizations.
 - Created mock datasets and performed hardware integration, system debugging, model testing, and end-to-end validation.
 - Assigned team responsibilities, monitored project progress, and ensured that development milestones were completed on schedule.
 - **QueueWise | Full-Stack Appointment & Queue Management System**
 - Built customer, staff, and admin portals with role-based authentication using Laravel Sanctum.
 - Implemented queue management, live status updates, and appointment booking, rescheduling, cancellation, and check-in.
 - Added service and staff administration, queue history, and automated backend feature tests.
 - **Weather App**
 - Built a weather application using an API to display real-time data and forecasts.
 - Designed a simple, user-friendly interface.
 - **PAPI Mobile Finance App (Internship Project)**
 - Developed a mobile finance management app for farmers to track and manage finances.
 - Integrated AI features for automated expense handling and insights.
 - Collaborated in a team of five BS Computer Engineering students.
-

EDUCATION

- Bachelor of Science in Computer Engineering – Silliman University | March 2026
